EDUCATION

Stony Brook University

Bachelor of Science in Computer Science

Stony Brook, NY

Aug. 2023 – May 2027

EXPERIENCE

Administrative IT Intern, Technology & Innovation

July 2026 – August 2026

New York City Department of Design and Construction

New York, NY

- Developed a TypeScript-based procurement tracking system in Excel to improve workflow organization and visibility across the Technology & Innovation department.
- Built and supported Power BI dashboards that transformed operational data into actionable insights for department stakeholders.

Production Assistant Intern

July 2025 – August 2025

Magilla Entertainment

New York, NY

- Conducted site and location research to support field production planning and creative development.
- Managed large-scale spreadsheets tracking talent, locations, legal documentation, and production logistics.
- Coordinated outreach with contributors, location contacts, and vendors while adapting to rapidly changing production priorities.

Help Desk IT Intern

March 2025 – June 2025

Hats & Ladders

New York, NY

- Provided technical support to SYEP participants, coaches, parents, staff, and administrators navigating training platforms and digital resources.
- Managed databases containing confidential user information and assisted users with account and platform-related issues.
- Collaborated with software and marketing teams to identify, troubleshoot, and resolve platform issues.

Office of Student Pathways Intern

June 2023 – August 2023

New York City Department of Education

New York, NY

- Supported logistics and execution of NYC Department of Education summer workshops and student programming.
- Developed a year-long communication plan for high school seniors, creating messaging to support postsecondary and educational pathways.
- Collaborated with NYC educators on education plans focused on computer science and technology.

PROJECTS

DraftIQ | *React, JavaScript, Node.js/Express, MongoDB, Player Data API, Jest, Vercel*

- Built and deployed a full-stack fantasy baseball auction draft platform with player valuation, league setup, roster tracking, draft history, and team comparison tools.

LyricsLens | *React, JavaScript, Node.js/Express, Axios, Spotify API, Vercel, Render*

- Built a Spotify-integrated music application with song and lyric retrieval and lyric translation across **17 languages**.

Playlistr | *React, JavaScript, Node.js/Express, MongoDB, YouTube API, Vitest, Postman*

- Built a full-stack playlist platform with authentication, song search, playlist management, YouTube playback, REST APIs, and undo/redo editing.

Marketplace Hunt | *TypeScript, HTML/CSS, Wolfie2D, Tiled, Piskel, Firebase*

- Developed a 2D grocery-shopping game with randomized objectives, inventory validation, NPC movement, collision handling, power-ups, and persistent progression.
